Further, regarding claims 67-68 and 75-76, none of the prior art of record discloses a method of detecting luminescence from a luminescent sample, namely the step of comparing the luminescence light transmitted from the sample sites with the luminescence light transmitted from the same sample site before the step of exposing the sample to the reagent or the environmental condition. Conventional art discloses a comparison between the transmitted light and a calibrated fluorescence, not the luminescence of the sample pre treatment.
